Reading the metadata

The survey is built up by questions, which are grouped into the following epidemiological themes.

Themes
Socioeconomic/demographic characteristics
Perception of Health
Medication
Women's Health
Reproductive History
Life Habits/Behaviours
Individual Disease History
Familial Disease History
Symptoms
Health Information

These high level themes are built up by the following domains.

Domains

Name	Description
soc	Socio-economy/socio-demographics
phs	Physiology
wom	Women's health
med	Medication
smo	Smoking

snu	Snus use
alc	Alcohol
bre	Breast diseases
can	Cancer
dis	Diseases
gen	Genetic tests
qua	Quality of life
qlq	Instrument QLQ-C30, quality of life
kas	Instrument KAS, sense of coherence
sle	Sleep
msa	Symptom
fac	Specific symptoms
lit	Health information

Each question in the survey, when saved as database variables, is named in accordance with the above domain names. E.g., the variable "soc_education" is the variable for the education level question, which asks the study participant about his/her education level. All variables in the database concerning socio-demographic issues start with the three letters "soc_", which unifies all "socio-demographic" variables into one and same domain name space "soc_". Moreover, all variable domain names together define the full name space for the questionnaire.

Questionnaire items and variable names

a) Below questionnaire element shows a question with a single answer option. The corresponding variable in the dataset is "soc_education" having the predefined answer options "1", "2", "3", "4", "5", "6" and "998".

[soc_education] - Education level

bg5. Which is the highest level of education you completed / are working on?
--

- Folkskola (up to 8 years) (5) University (3)
- Realskola (up to 10 years) (6) Other (please state) (4)_____
- Nine year school (1) Don't know / refuse (998)
- Gymnasium (2)

b) Below questionnaire element shows a question with a multi answer option also including open text fields. The corresponding variables in the dataset are:

Dataset variable	values
soc_sibling_full	0, 1
soc_sibling_half	0, 1
soc_sibling_oth	0, 1
soc_sibling_no	0, 1
soc_sibling_998	0, 1
soc_sibling_full_other	Free text
soc_sibling_half_other	Free text
soc_sibling_oth_other	Free text

[soc_sibling]

Do you have siblings?

Yes

Full siblings (number) [full]
_____ [full_other]

Half siblings (number) [half]
_____ [half_other]

Other siblings, e.g. step siblings_____ [oth_other]

No [no]

Don't know / refuse [998]

c) In below questionnaire element there is a question with grid answer options also having open text fields. The corresponding variables in the dataset are:

Dataset variable	value
soc_wrkpresent_pres_occ	Free text
soc_wrkpresent_pres_plc	Free text
soc_wrkpresent_pres_dur	Free text
soc_wrkpresent_pres_1	0, 1
soc_wrkpresent_pres_2	0, 1

[soc_wrkpresent]					
What is your present occupation and place of work?					
	Occupation (e.g. engineer, nurse) [occ]	Place of work (e.g. office, hospital) [plc]	Worked number of years [dur]	Full-time Part-time [int]	
				[1]	[2]
[pres]	_____	_____	_____	<input type="checkbox"/>	<input type="checkbox"/>

d) When questions are updated, the corresponding variable name will receive a version number. The number will be placed within the name after the domain name part, e.g.:

Variable in dataset
soc_wrkpresent_pres_occ
soc2_wrkpresent_pres_occ

Variable extensions

Extension is a central notion in the metadata design used to build up the name space in the questionnaire data. Besides the domain pre-extensions described above there are also in- and post-extensions. E.g., "eat_weight_kg" is the name for a question concerning weight measured in kilogram in the eating disorder domain of questions. The most common extensions are:

Extension	Meaning
cm	Centimeter
kg	Kilogram
cl, 33cl, 50cl	Centiliter
frq	Frequency
dur	Duration
tms	Times
nbr	Number
date	Date
yrs, yr	Years
mnts, mnt	Months
wks, wk	Weeks
days, day	Days
hrs	Hours
min	Minutes
sec	Seconds
whc	Which
amnt	Amount
oth, other	Other

sum	sum
isoxxx	ISO-code
icdxxx	ICD-code
dsmxxx	DSM-code

Variable values - answer options

The answer options, i.e. variable values, are free text or predefined values. The most common predefined values for the variables in the questionnaire dataset are:

Precode	Meaning
1	Yes
2	No
1	Male
2	Female
1	Checkbox checked in a multi answer option question
0	Checkbox not checked in a multi answer option question, but shown to the study participant
999	Refuse to answer
998	Don't know / refuse
997	Don't know
996	None of these. Multi answer option questions often also have this answer option so the study participant can choose to say that none of the other answer options applies.
995	Question has been shown to the study participant, which chose not to respond to the question.
null	The variable does not have a value registered, i.e. the corresponding questions in the survey was not shown or

answered by the study participant. "null" is the symbolic expression for a missing value.

Missing by design

The Karisma 2 baseline survey includes logic, which distributes an individualized set of questions to the survey responders. This will result in a dataset which recorded value wherever the respondent responded to the distributed question. This also means that wherever there is a missing value in the dataset, the responder was not given that question or did not respond to that question. The latter case is only possible if the survey was not completed, because all questions are mandatory in the survey.

This phenomenon is called "missing by design" and is of interest in analysis situations.

Longitudinal data

At study entry, the **Karisma 2** study participants respond to the baseline survey. This survey includes questions of "ever" character, e.g. what diseases the study participants ever had in their life. The study participants also respond to surveys at follow-ups, which occur at 1 month, 3 months and 6 months after study entry. Some of the participants respond to the "Exit" follow-up survey, this occurs when they interrupt their participation in the study. Some of the questions in the Karisma 2 follow-up surveys refer to the time "since last response" instead being of "ever" character. This is marked in the follow-up survey document (PDF-file). The following variables are available in the dataset to identify which questions were asked to the study participant at the different occasions.

Variable	Meaning
survey_name	Name of collecting survey, e.g. KARISMA S1 BASELINE, KARISMA S2 FOLLOWUP, KARISMA S3 FOLLOWUP, KARISMA S4 FOLLOWUP, KARISMA S20 EXIT
survey_version	Version of survey collecting data for study participant.

status	Whether survey respondent finished survey or not. "complete" means finished survey.
baseline_mode	Whether survey asked baseline questions or follow-up questions to the responder.
interview_lasttime	Time span which the questions of "since last response" character refers back to in the follow-up surveys.

Background - length, weight, age, education

phs_length_cm - Length

bg1. How tall are you?

- Taller than 200 cm (201)
- "Answer options from 200 cm to 140 cm in steps of 1 cm"
- Shorter than 140 cm (139)
- Don't know / refuse (998)

phs_weight_kg - Weight

bg2. How much to you weigh?

- More than 200 kg (201)
- "Answer options from 200 kg to 35 kg in steps of 1 kg"
- Less than 35 kg (34)
- Don't know / refuse (998)

yearofbirth - Year of birth

bg3. What year were you born?

- "Answer options from 2020 to 1880 in steps of 1 year"
- Don't know / refuse (998)

phs_bodyshape - Body shape

bg4. Please estimate your body shape today, at age 18 and at age 7.

For us, it is most important to know how the body shape has changed over time.

Reproductive health

Menstruation and menopause

wom_mensfirst - Age at menarche

fer1. How old were you when you had your first menstrual period?

- 8 years old (1)
- 9 years old (2)
- 10 years old (3)
- 11 years old (4)
- 12 years old (5)
- 13 years old (6)
- 14 years old (7)

- 20 years old (13)
- 21 years old (14)
- 22 years old (15)
- 23 years old (16)
- 24 years old (17)
- 25 years old (18)
- Not got a period (no)
- Don't know / refuse (998)

wom_1styear_period – Had periods in last year

fer2. Have you had a menstrual period during the last year?

- Yes (1)
- Don't know / refuse (998)
- No (2)

If fer2 is "no", show fer2a and fer2b

wom_1styr_reason - Reason for no period

fer2a. What is the reason that you did not have a menstrual period during the last year?

- Pregnancy or breast feeding (1)
- Menopause (2)
- Medication (3)
- Contraceptive (4)
- Gynecological surgery (5)
- Intense exercise (6)
- Anorexia / eating disorders (7)
- Other (8)
- Don't know / refuse (998)

wom_1sttime_previous_age – Age having period last time

fer2b. At what age did you have menstruation the last time?

- "67 to 1 in steps of 1 year"
- Since birth (0)
- Don't know / refuse (998)

If fer2 is "yes", show fer2c

wom_1sttime_recent - Know time of last period

fer2c. Do you remember when you had your last menstruation?

- Yes (1)
- Don't know / refuse (998)
- No (2)

If fer2c is "yes", show fer2d

wom_lsttime_date - Date of the last period

fer2d. When was the first day you had your last period?

wom_periodregular - Usually has regular periods

fer3. {Earlier in your life as an adult, As an adult}, did you have periods each month and could predict the first day of your period with an accuracy of 5 days?

- Yes (1) Don't know / refuse (998)
- No (2)

If fer3 is "yes", show fer3b

wom_cycle - Days in the cycle

fer3b. {In the last year you had your periods, how many days did you usually have in between your periods? How many days do you usually have in between your periods?}
{Example: if you used to have your period same day each month, your cycle is 30 days.
Example: if you use to have your period same day each month, your cycle is 30 days.}

- 22 days or shorter (1)
- 23 - 26 days (2)
- 27 - 30 days (3)
- 31 - 34 days (4)
- 35 - 38 days (5)
- 39 days or longer (6)
- Don't know / refuse (998)

If fer3 is "no", show fer3c and fer3d

wom_cycle_min - Minimum days in cycle

fer3c. {You mentioned earlier that you have had irregular periods.

In the last year you had your periods, how many days did you usually have in between your periods when they were the most frequent?

You mentioned earlier that you have (had) irregular periods.

How many days do you usually have in between your periods when they are the most frequent?

{Example: if you used to have your period same day each month, your cycle is 30 days.
Example: if you use to have your period same day each month, your cycle is 30 days.}

- 22 days or shorter (1)
- 23 - 26 days (2)
- 27 - 30 days (3)
- 31 - 34 days (4)
- 35 - 38 days (5)
- 39 days or longer (6)
- Don't know / refuse (998)

wom_cycle_max - Maximum days in cycle

fer3d. {How many days did you usually have in between your periods when you had them the least frequent?

How many days do you usually have in between your periods when you have them the least frequent?}

- 22 days or shorter (1)
- 23 - 26 days (2)
- 27 - 30 days (3)
- 31 - 34 days (4)
- 35 - 38 days (5)
- 39 days or longer (6)
- Don't know / refuse (998)

Contraception

wom_contr_whc - Ever used

fer4. Have you ever used any of the following hormonal contraceptives?

Yes

Mini pills (min)

Combination pills (regular oral contraceptives) (com)

P-injection (pin)

IUD copper (intrauterine device) (coc)

IUD hormonal (intrauterine device) (hor)

IUD other kind (intrauterine device) (coo)

P-implant (pim)

Other (please state) (oth)_____ (oth_other)

No (no)

Don't know / refuse (998)

If fer4 is "yes...", show fer4b

wom_contr - Start year and total use time of contraceptives
